Personal Information

Motivated and detail orientated student with a strong academic background in Information Technology and Automation related studies. Demomnstrates solid Knowlegde of database systems, SQL, systems analysis, and technical problem solving. Seeking academic or training related opportunitiesto further develop research, analytical, and technical skills.

Education

Information Technology

Nelson Mandela University

Academic highlights:

- Desined logical and physical Entity Relationship Diagrams (ERDs)
 - Applied database normalisation techniques
 - Completed SQL based assessments involving complex queries and joins
 - Produced technical reports on manufacturing and automation topics
-

Academic Projects

Database design and Project:

- Designed a logical and physical ERD for a social service organization
- Identified entities, attributes and relationships based on real world requirements
- Applied normalization to ensure data integrity
- Implemented SQL queries for data retrieval and analysis

Manufacturing and automation Report:

- Conducted detailed research on the manufacturing and assembly of wind turbine blades
 - Documented production processes from raw materials to final testing
 - Integrated safety, quality control and process efficiency considerations
-

Technical Skills

- SQL
 - Database design
 - System Analysis and documentation
 - Visual paradigm
 - R
 - Microsoft word, Excel, PowerPoint
-

Research and academic skills

- Academic writing and report structuring
 - Information analysis and interpretation
 - Technical documentation
 - Problem solving and critical thinking
-

Languages

- English- Proeficient
 - Xhosa- Proeficient
-
